

DESCRIPTION

PicoLab[®] Verified 75 IF Irradiated is a formulation providing 20% protein for mice and rats in protocols where dietary isoflavone levels need to be assured and verified for estrogen-sensitive protocols. This diet is a complete life cycle diet formulated using managed formulation, delivering Constant Nutrition[®]. This is paired with the selection of highest quality ingredients to assure minimal inherent biological variation in long-term studies. Irradiation treatment and special 3-ply packaging provide virtually bacteria-free dietary control.

1. Formulation based on calculated values from the latest ingredient analysis information. Since nutrient composition of natural ingredients varies and some nutrient loss will occur due to manufacturing processes, analysis will differ accordingly.
 2. Nutrients expressed as percent of ration except where otherwise indicated. Moisture content is assumed to be 10.0% for the purpose of calculations.
 3. NDF = approximately cellulose, hemicellulose and lignin.
 4. ADF = approximately cellulose and lignin.
 5. Physiological Fuel Value (kcal/gm) = Sum of decimal fractions of protein, fat and carbohydrate (use Nitrogen Free Extract) x 4,9,4 kcal/gm respectively.
- NOTE: When assayed, actual levels may vary from calculated values.**
